quote: Oops...****, I keep playing games where I DO know how to bind messages, whenever I come upon a game where I can't, I just forget! Sorry to get your hopes up. Alas, I have been trying to work a pathetic bind out of the Renegade code, but nothing I have tried appears to be accepted by the games configuration. Oh well, I'l get it some day.  Well, when you get it, Please spread the joy.  I really would love to see this feature.  Seems like every time I stop to type "here come the flame tanks...." it's either WAAAAY to late, or I've been offed in the process.   [ April 04, 2002: Message edited by: Particle Noun ]
