I kept getting to the part of the Chateau mission when Mendoza comes after you. I got killed a couple of times and got ****ed. Sonuva***** picks up health packs and such. Anyway Before entering the chateau I would use my C4 to blow up the helipad and then I had a funny idea. Mendoza likes to go stand on the center of the helipad so before I went into the chateau I put 6 C4 all around the little Nod logo on the helipad. I completed the mission and then fought Mendoza by shooting him the normal way. Well when he went and stood on the center of the helipad I activated the remote C4. BOOOOM! HAHA Mendoza's health dropped to 0 at which point he starts heading for Sydney. I came up behind him and torched his backpack with Fire as a FY to him. No More Mendoza.. It was very funny.
