I would like to just say that all you who do not like the idea of cheats, DO NOT USE THEM! For all those who find it helpful then ,COOL, use and enjoy. You spent your money, its your game so how you use it is up to you. Do you really think the company who produces these games cares if you use cheats or not. Besides many people buy knowing they can get cheats to help them. I have a fast machine with a GF3 card and I have problems with areas due to frame rate, so a cheat would help. Seems the company hasn't issued a patch to fix it.
