Everyone who is checking this post regularly.....here's a little info for you...I have checked a previous cheat message and it said the cheats were hidden C:Westwood/Renegade/Data and open 'always.dat' with notepad.Many people have questioned this as the file is 500Mb+ so doesn't open. You CAN open the 'always.dbs' with notepad and if you 'Edit>Find' for 'cheats' you'll find all kinds of cheats listed there (apparently there is a 'cheats' option under 'controls' on the options menu!). I cannot get them to work, but you guys can try!!
