I found him fine too, once I did it the other way. Maybe you don't have to release them at the very end, it could just be something in the general order that you complete the objectives. However, I'm almost positive that there IS some kind of bug involved, it's just that not everyone runs into it. If you check the general forum you'll find another guy with the same problem and the exact same symptoms that I and this guy encountered.
