You can't place a nuke or ion on top of the harvester because it just goes straight through the harv and arms itself on the ground underneath the harvester. We have tried it, we first jumped on top of the ref on field then we tried ti nuke the harvester by climbing onto it, it armed on the ground. As soon as the harvester drives off it will move underneth you, you can't hitch a ride on a vehicle like on BF1942.
