Yeah i'll do that I have dumped the 325MB big file from my generals directory and i have to organise them in some order. Whats the best compression to use rar or zip for the segments?It will take some time to upload (max 32k/s) but i should be able to get them uploaded over the next few days when my connection is idle.Update: the textures are mainly in DDS format and 77mb worth of tga files. I can't sort them into catogory but they will RAR into 15, 10MB files. It's hard to put 3000 files in a logical order appart from alphabetical.
