Its not the Mod or anything related to the kind of Mod It is just the source code. To prevent the Bug PERMANENTLY restart Renegegade, and join directly the Mod you wanna play, after you played the mod, restart Renegade again.The bug will never apaer if you do it this way.(The bug appears in 95\% of cases if you have played a .mix (C&C-Mode) ga,e on WOL and then join a mod, and in 50\% of cases it happens if you play a .mix after playing a Mod Game before)If you have notived other times when the Modbug apears, let me plz know, so I can correct my point of view.
