I heard there was gonna be a tiberian sun renegade project. I don't really know if this is true. But if it is, when is it's release date? If there isn't a project like this I would like to start making some tib sun maps. But if it's not released in a month or two then I'm just gonna say screw it and make my own. And if they can't complete a tin sun project in two months then they're just goin' too slow.
