doesnt the building controller have to be set into the building for it to work??If i move the one from the barricks then the barricks won't work right?....how bout if i copied the controller of the same kind and them moved it?or if i made a tiny object on top of the ped(with a build.cont. in it) that you would have to destroy in order to destroy all buildings [February 17, 2003, 20:21: Message edited by: Titan1x77]
