quote:Originally posted by OrcaPilot26: quote: Get your mod team to make their own models... If  
you guys can actually do that without using something from Renegade. \*cough\*  
\*mediumtank\* \*cough\*\*cough\*That tank didn't go into Renegade\*cough\*1. It still was  
Westwood's2. It has more resemblance to the Renegade medium tank than the RA1 medium  
tank which is an M1A2No, it would be the M1A1 or equivilant. The A2 came out in the mid-nineties  
and has a recognizable cylinder on the left side of the turret, the CITV (Commander's Independent  
Thermal Viewer) and some more electronic equipment, along with upgraded ordnance like STAFF  
shells, improved HEAT shells, MPAT shells, and the normal sabot shells.The M1A1 did not have  
most of the improvements that the A2 did. It had the HEAT and sabot rounds, but nothing else  
besides the machine guns and improved armor.The Renegade Alert tank is this:  
[http://www.cncrenegade.info/redalertmod/images/models/vehicles/MTank\\_Render.jpg](http://www.cncrenegade.info/redalertmod/images/models/vehicles/MTank_Render.jpg)That never  
made it into Renegade. It was made by a friend of mine in Westwood... It wasn't made totally by  
them. He also made the r4ped version of the tank which is present in Renegade today.
