Does anyone remember temple? My first released map which came out back in June?

Considering it did so well on so many websites I've decided to re-make it and release it as a .mix

It's gonna be called temple-revisited and it'll be finished in the next coupla days. Any sites wanna host it alongside the old version, post here [January 28, 2003, 03:05: Message edited by: killakanz]
