---

get it from <http://www.sourceforge.net/projects/rentools/readme.txt> file to see about all the new scripts. Note that not all the new scripts in this version have been tested (that's why it's 1.0 RC1 and not 1.0) so if something doesn't work as advertised, let me know & I can fix it. Once all the scripts are tested and work (which I am going to try and get done ASAP), I will release 1.0. 1.0 is still going to come out by the end of the month though.
