Ok, I will post the link soon but I was an idiot and put in a 12mb song as the background music! Retarded huh? And now I can't open the leveledit file. So I will have to redo the whole of the commando parts over again. But here are some screenies of the finished

product. <http://www.n00bstories.com/image.fetch.php?id=19>

whooot! I'm also stupid as only the host can hear the music apparently. Here is the link to it

though. http://www.fileplanet.com/dl.a.spx/?planetcnc/ammo/nova/c_c_dm_cambodia.zip

3 errors on it, 2 PT zones (one on each chopper) don't work. But the other 2 do. The third error is a hole in

the map, but it doesn't effect gameplay. You can play the map from this link or wait another

couple of days and get the map minus the 12mb song and the errors from Renegade Realm. But as

I said, me and a buddy just played it online 1 on 1, simply awesome fun! [January 21, 2003,
