If you want no vehicles (including no harvester I believe) then don't put in Weapons Factory and Airstrip building controllers. Then the vehicles will be called 'unavailable' in game. There's other ways to disable vehicles as well, but it depends how much work you want to do. It involves changing purchase settings which can be done differently for a .pkg and .mix file. Are you changing a map you've made or official Westwood maps? I've created a snipers only map pack using westwood's maps. You may just want to use that for games.
