quote:Originally posted by Laser2150:I don't understand ACK, im not Stupid, He Tells Us we should start modding and stop talking, but then he trashes all of our work!He isn't trashing your work, he is trashing your garbage. The garbage that you get all hyped up about, and think is soooooo neato, when you should be practicing and trying and becoming better.Dont hype up little bits of trash like a 25000 polygon building you make that dont even look right.instead toss it aside, start over and keep working until you have something worth praising. I am still working, and have made many maps that never saw daylight. So get to work boys.
