quote:Originally posted by Kirovy1234:Is there any place to download these programs? I can't find them on my computer Corel runs roughly in the price range of \$320.00USDPhotoshop 7.0 is currently running about \$474.00USDYou may be able to purchase an academic version through a local college bookstore for a bit less as well.For a cheaper route, try Paint Shop Pro, its reasonably priced, and is a good program for the tight budget.Personally I use Adobe Illustrator, Macromedia Freehand, and Corel Draw for graphics, and Maya, 3ds Max, Bryce, Poser, Lightwave, and Autocad 2k2 for models. I prefer Illustrator, Maya, and Lightwave, simply because I use them daily for work. There are numerous programs available on the market, and your budget is your only limit. (prices obtained from Pricegrabber.com)
