Ok here's my problem. From what he's posted I see him as a mediocre modeler. Now from a reputable source it seems he's gotten better. Alright but I haven't seen it. What I have seen is him post on every one else's threads saying how his models are better. Maybe they are maybe they aren't but unless he's going to post his work I don't see why he should be able to put down others. I don't think anyone should put down anyone ever. You tell them why you don't like their model in a polite manner then tell them how they might fix it.
