quote:Originally posted by Taximes:I'm having a problem with my code, and I don't know where else to ask it. Basically, what I have is a variable in the middle of a string being printed to an output file.
code:Print #1, "StringI" + variable + "StringII"
Now, what I want that to result in is this:
code:StringIvariableStringII
But instead, I get:
code:StringI variableStringII
It puts a space after the first part of the string, and I don't know why... Anyone know? :Shave u tried
code:variable2 = "StringI" + variable + "StringII"
print #1,variable2 [December 26, 2002, 21:41: Message edited by: Francois]
