I'm having a problem with my code, and I don't know where else to ask it. Basically, what I have is a variable in the middle of a string being printed to an output file. `Print #1, "StringI" + variable + "StringII"` Now, what I want that to result in is this: `StringIvariableStringII` But instead, I get: `StringI variableStringII` It puts a space after the first part of the string, and I don't know why... Anyone know? :S
