I want to add a vis track to one of Westwood's buildings so it becomes invisable at frames 4 and 9. I've gotten it work on a box I made but it seems vis tracks (for me at least) refuse to work on Westwood buildings.(I've only tried it on the Air Strip) Has anyone done this sort of thing and gotten it to work? I want a vis track so a new image of the building appears at those frames.
