quote:Originally posted by aircraftkiller2001:Why the hell would you make a GDI Turret?Use the GDI Guard Tower. Since I got Glacier Flying included in the patch, that means the Guard Tower will no longer crash the game as the model is present in Renegade now.When did the Guard Tower ever crash Renegade? I have made a map with a Guard Tower in it a long time ago, and it never crashed. Just wondering.You would have to put the Guard Tower's W3D into the mod directory you're working with, then you'd be able to use it. If you didn't do that, it would crash the editor.Too many things makes the editor crash.
