Every once in awhile I'll reinstall q3 just to check out all the new character models people have sent in. You're right about the character stuff, but there still are possibilities. Especially if we have enough people rallying for a "tweak" from WS. Then they usually respond. For example: JW was making some CTF scripts and he must have given WS an idea because they implemented them. So I believe "where there is a will, there is a way!"
