What is up with all the nostalgic mods? I think there is like only 2 or 3 mods that dont try to look like a different cnc game. The others try to take off from the renegade theme....Anybody here want to help me make a Renegade 2?I mean if westwood wont, why not us?We can make bigger better vehicles, more bad 4ss characters and some crazy wicked technologies.Anybody agree? Wanna join me?Here is what I can bring to tha mod:I am pretty good at Gmax models, Great with graphics, good with skins and I am average with leveledit.
