quote:Originally posted by Ingrownlip:Gernade is the only conceivable method. Might be possible to make an arc-like MRL shot.making the v3 have a arced course its easy. the pronblem its make the missile deseappear when u shoot, then reappear after an elapsed time... like in ra2 when a v3 shoot:1- missile raise up2- missile get away (no more missile on the v3 truck)3- new missile respawn after en elapsed timei cant make the The Step 2 and 3, execpt if anyone have a good way....
