Hey the official site for Gta3:Vice city is [www.Kentpaul.com](http://www.Kentpaul.com) don't ask me why they have that URL I really don't know, they have 3 screenshots; one over looking a river/sea with the sunset and one of a roller blader, plus one looking up on a building and if the textures are going to be like that in the game ==> Edit: Wait there's more! Just look thru most of the sections and theres quite a few screenshots [ August 10, 2002, 04:29: Message edited by: Planetshaun.co.uk ]
