Thanx to all those who helped me in figuring out the BLACK SKIN problem.. now I have a new challenge for you.. or a question:Whenever I play the game, the colours are fine, but when I exit out of the game, the background seems to turn EXTREMELY bright! I have a problem with this and my skinning... When ever it generates the MIP stuff, it creates numerous of the original (no problems) but in an extremely yellow colour (problem)...Is it my game? My video Card (ATI 128 PCI)? Or any other ideas?
