You convert the object you want to "extrude" a new ment should appear which has red squares/trangles & a cube etc etc, scroll down a bit until you will reach extrude now where you saw the red square earlier click that and select the square you want to extrude, now go back to extrude ith ur square selected and put a number into the xtrude number box experiment with it until you get what you want!--Shaun--ps- this is how I made the levels on my C&C_Towers map!
