bumping alog, now that blazerotate 3.0 is complete, i will be busting A** to finish this proggy up soon and hopefully have a beta soon!!!buzz, nice attempt at faking the ai, lol.Takes a little more knowledge of photoshop (or whatever you used) to fool most of the people here into downloading your app.how about screenshots of some code snippets, maybe of what the proggy looks like, a filemon spec. (nothing) didn't thinks so.Dante
