Brutus! I had a great idea! Make it so when people buy a minigunner, they have the option of "Grenade Attachment" for 20 bucks. This adds grenagde launcher to minigunners, and gets rid of Grenadiers! And for the Gnome side, make it hand-held grenades. Oh, and for the gnomes, a great vehicle would be a catapult! It fires large rocks at great ranges! Just wanted to add an idea or two,LazrClawz
