King, its VERY important that somehow we can make it easier for someone to be able to try mods. Don't you get it, as long as there is no way to tell what a server is running, mods are going to die, or were going to be flooded in crappy endless single player or dumb idea mods. Multiplayer is what makes a game great, and renegades mod multiplayer support is horrible, just like westwoods other games. They take the time to work on all these tools and then don't support them properly, they are wasting their time, modding for this will die out soon if it stays in this situation.
