Before the mod tools we're released I made an icon for EVERY UNIT not purchasable in the game, Civilians, etc and ones for those who didn't have their own icons, mutants, etc. Then a few days ago I figured out how to use 'em ingame. All my icons are at <http://rensg.federationstudios.net/RNewPTs.shtml>EDIT: And once ya figure that out it's pretty easy to figure out how to do the "official" type skins with the arrow-switching.[ April 25, 2002: Message edited by: Taximes ]
