I personally had my Serial taken and used. I had to buy the game again. He has done a federal offense. Stealing. Not just 1 person's Serial, but over 450 people's. You say "give him a break". This isn't my first run in with the kid. I've met him on Tribes2, Counter-Strike, and a few other games. He has never done anything THIS bold, but he has done illegal things. He committed a CRIME. He didn't just make a virus that can go away with reformat, even though that is illegal. He took 450 people's \$40-50 and used that. He took away their right to play. He deserves to be in court, which I hear, he will be in soon. I hope that is true. This is not a flame, this is a simple stating of the facts. He goes around acting like it never happened, trying to regain all of our trust so he can do something like this again. BTW, Griever, is that even possible? You would have to restart your comp every 5 min, wouldn't you?
