Please help us many of us now have working original maps apart the the AGT/Obelisk. We have place the controllers as described in the howto, many of use have tried the obelisk in both objects/vechicles/nod obelisk and muntion/etc/etcCan you please tell us how to make them, surely it can that hard that someone at westwood can give us a couple of hits on how to do it so we can get these levels out to the world, make renegade even more popular and westwood even more rich?Come on guys support!
