On the right side... has a list of stuff.. go to munitions, go to weapons, click on the first thing under that(i forgot it's name) then go to gdi\_ionbeacon or what ever it's called.. click on it once, then under that list of things there are some buttons.. the like 4th one is mod. Click on that, then click on the tabs up top to get to settings and stuff..Then after that you have to edit the buying menu to take out the nukes too. That made it pretty easy..
