Renardin6AircraftkillerThat interior looks like crap. Show this shit with a texture on it, I don't like staring at it for five minutes and still not be able to figure out what goes where and how it all fits together.

As sayed before we show what we want, your eyes see only crap as usual. Try to understand : we don't care anymore about your comments on our work as they are shity flame most of the time.

Then don't respond, since that's obviously a knee-jerk whine reaction that your head conjures up as a defense mechanism against admitting that it does suck.
