DarkDeminBuy the full version and bite me it is a really good game and it has nothing to do with far cry. If you are talking about the physics engine and the water graphics all games are using that now... Most of the gaming magazines love it. Maybe if you didn't suck at playing the game you would like it.

Instead of making an ass of yourself and saying I suck at the game, maybe you should learn to read better. I didn't say it was just like Far Cry, I said it looked like a copy-cat of the game, which meant it had the same jungle setting and feeling as Far Cry. It was really buggy and full of shit, which defines it as a copy-cat game. That is my opinion, and maybe you should control yourself before you jump right in and randomly say I suck at the game. If you really think I suck at the game, then how come I only played the game for 2 minutes, did not die, killed a few people, and left? That is your case of sucking at the game. You're an idiot.
