You're forgetting one thing - SBHs can rape MRLSs. Also, you only need 2 SBH to have a high probability of getting a building. (Same strategy that deathgod mentioned, except one of the SBH in building 1 shoots out the door at building 2. Then after EVA announces the attack, drawing attention away from building 1, both SBH fire away at the MCT.)

So you get your 2 SBHs, run to the enemy base, kill any MRLSs you pass on the way, and take out the WF. Then there are no more pesky MRLSs or APCs to worry about.

Granted this will not work 100% of the time, but it is a VERY effective strategy if used properly. That's really the key to Renegade, though. There's no single UBER strategy. You really just have to know when to use strategy A vs. strategy B.
