Except I don't have access to my computer for at least the next three months, and I'm not sure Viper would want to try to demonstrate the tactic without me...

(Also, if we played a game specifically to demonstrate this SBH strategy, you'd have to be the most pathetic players ever not to specifically watch for it and defend. And it's really a surprise attack more than anything else, so if you KNOW it's coming, it probably won't work so well...)
