I'm a real big stargate fan. BTW his name is O'Neill (with two L's). In one episode they used the stargate to get to a planet that was directly in the way of earth's sun. When they went through the gate the worm hole created by the stargate hit a solar flare and it sent the worm hole spiraling around the sun and ended up back to earth but in the year 1969. I forgot what was Major Carter's explanation was but I remembered it sounded real.
