I just got banned from the pitts server, and i was acussed of cheating eventhough i was running RG, and even ACK thinks that i cheat, i never cheated in my whole entire life, and will not cheat. But anyways, i was asked to get a ss, and i tried to get a ss, but my freakin luck just turned its back on me, and my comp suddenly froze, and that happens once in a while to me, and its my graphic card thats doing it. Anywayz i was about to take a ss, and my comp froze and my renegade exited to the desktop and i showd them the ss i took of the error i got and then they say that i photoshoped it, anyways, you guyz tell me if this ss looks photoshopped! Please be fair and squir, dont be like the MODs such as ACK, jarhead, gr8slayer, c4kiddy, because all they did was just ban me and not give me another chance, not that i really care about their servers, but its just that now anyone is gonna be thinking that i cheat! this is the link for the ss...
