well for soldiers it'd be impossible to probably kill those guys that fast, it takes 8 headshots to kill 1 full health engee with rifle

Now even if he was standing still from that far away it'd be even hard to get 8 headshots in a row seeing as how the head bobs up and down

But knowing the guy doesn't suck he wouldn't just stand still if being shot by a rifleman So the chances of him shooting one and then killing the other that fast is improbable

But if it was a sniper then yeah it's possible.
