OMG I GAVED YUO ALL MY CD KYE!!! OGM OMG OMGM !!!!!1111one one one one . . .

I have 2 cdkeys, both valid. Also when I ipen the file all I get is
4498944275837080605051940982579048398925071596483533152956944725747169681399150481037474719956523030019481244403926790978 9563111 so unless that big number is my cd-key and I had to enter all of that in when I installed Renegade, you don't have it.

Just to let you all know in advance, I may have to remove the RenAlert .993 patch from my site Since my server is at my own home, and I can't currently afford a dedicated server such as something on servermatrix. . . I will have to remove it because otherwise I can't get online to play this, or anything for that matter, the only times I can post is if I am really lucky, like now. I will ad it back one once I can afford to get a good server. If you would liek to help me out to get a good server please go to http://egames.servegame.com and click the google ads at the bottom. They are the text ads, not the image. THANK YOU

Also, who submitted my site to be a file mirror of RenAlert .993 patch? Just wondering is all.
