rm5248MilkyLepThat seems more like an ad than an intro.....but good job anyway!

Modeled it after the Red Alert intro, which only has short clips. =/

That wasn't the Red Alert intro, that was the prologue/preview movie, the Red Alert intro was the one that had the Red Alert logo open, revealing the Hinds/Longbows following a mammoth tank in the snow firing missiles at it before it went to the main menu.
