Sir Phoenixrm5248Sir Phoenixrm5248MilkyLepThat seems more like an ad than an intro.....but good job anyway!

Modeled it after the Red Alert intro, which only has short clips. =/

That wasn't the Red Alert intro, that was the prologue/preview movie, the Red Alert intro was the one that had the Red Alert logo open, revealing the Hinds/Longbows following a mammoth tank in the snow firing missiles at it before it went to the main menu.

Intro, prolog, they have simmilar meanings. =/

It doesn't matter how similar or not their meanings are. They are two completely different movies, the Red Alert intro is the one that plays each time you start Red Alert, shows the Red Alert logo open showing the Hinds attacking a mammoth tank. The Prologue was the one that played once when it was first installed, showed Einstein/Hitler then the crossing titles while going down the hall, then the little movie clips of the tanks/helicopters/etc.

Prolog was too hard to spell.
