ninjahhGum is the clan

Screenshot of them saying they cheat

ANd we were playing them, also they only made hs, we were next to each other and died in 1 shot..

They cheat for sure, here is the proof..

Please have the renguard community to ban them..

You are pretty retarded if you think they cheat because of that. Did you try locating them on Renguard? Sure Renguard doesn't stop all cheats, but nobody on CW knows how to bypass RG.

You are an idiot. You thought I cheated because I had a 90% hs ratio against you in some random newb server, I told you I cheat yeah, just so you would leave me the fuck alone. Then I join, you get me banned because you are butt buddies with the admins, I join up again, do a stupid test for you, take 10 screenshots, and even add you to MSN and you are still on my MSN. Only then do you think I dont cheat, and after that I own you some more in the SAME game and you want more tests and screenshot because apparantly now I can load bighead and final ren in the middle of a game without leaving. I gave you more ss's over msn and only then were you satisfied. Here is an idea for you, its called occams razor. It is a pretty simple "law" that says, in anything the most simple solution is often the most correct. In this case you are playing against some of the most skilled players in all of Renegade and you have been sheltered by ladder games, maybe so much as to think you are the best sniper ever. You play them, get beat horribly, even tho they are on Renguard and are positivly not cheating because I know them personally. You accuse them of cheating, like you accuse anyone better than yourself. Occams razor kicks in, what is more likely? They are cheating even though you accuse anyone who is better than you of cheating even if they prove they arnt (apparantly a Fraps video couldn't convince you that I dont cheat either), or that they arn't cheating and you just suck? Your call newb.
