This is why all actors in the movie Predator should be run states. Arny is just a wealth of great statements, and Ventura was always fun to watch when he was Gov of MN. That leaves three more actors in that movie that need to lead states!!!

You have to admit that these people are much more fun than the normal public officials. I mean...who really knows off the top of thier head who leads Maine? But everyone knew Arnold and "The Body" when they were in charge!

Weather or not they do a good job is a whole different issue!
