Well generally it wont be like a super mod like Reborn or RenAlert, but it is a mod and will have changes in units and in the game. So basically it wont take a year(s) to make. We basically need another modeler for some of our infantry, and a modeler who could make weapons and/or vehicles. We need 7 new vehicle models all together, and about 6 new weapon models.

We have some pictures and status done but most of it is private right now

So anyone who can make us a model(s) please email me, or just post right here on this thread
