Out of those the only bad one is Brdige which is Flingstone.com browser hijacker.

To remove it properly: <http://sarc.com/avcenter/venc/data/adware.winfavorites.html>

If you want to tidy up your startup a good place is

<http://www.lafn.org/webconnect/mentor/startup/PENINDEX.HTM> where you can look up all the programs and see what they are, and if you need them.
