[NEFobby[GEN]]

Instead of a blue ray, what will it fire, or look like when being used?

Well, it will act like morphine, but instead of being a shot it will hit the recipient in the head knocking him/her out for approximately six seconds. Then when the character gets back up it will have all of its health!

Looks Great! Keep up the Kick-ass job!

(yes i know morphine does not affect someones health)
